Homeowners Underestimate Project Costs - CONTACT US!

- Almost a third of homeowners research project costs to understand if they received a reasonable bid. A quarter of homeowners research project costs to help with budgeting, and nearly 20 percent use the research to help them decide if they should complete the project DIY.
- When homeowners were surveyed about the project costs for 20 common home projects, the majority who incorrectly estimated a project price, guessed less than the actual project cost.
- All data provided is sourced from HomeAdvisor.com's 2015 True Cost Guide Report released in April.

Hire an Architect - On Average \$4,857 or 10% Construction Cost

Hire a Structural Engineer - On Average \$527 or 1% Construction
